If you're interested in learning to save money on utilities, finding out how to live greener, starting a business in this emerging field or just learning more about the green revolution, this is the place to be. Here's a list of the workshops planned for the day:

- Energy Conservation – with sessions for both commercial and residential applications
- Residential Wind
- Solar - Photovoltaic & Hot Water - commercial and residential
- Geothermal - commercial and residential
- Switching energy suppliers
- Green Gardening/Water conservation
- Sustainable Living Practices
- Using Geospatial Systems to determine site selection for solar/wind – a GIS demo

There will also be a special Kid's Corner for younger participants.
