

Green Technology Public Seminar

Solar Electricity for Residential Applications

Will solar electricity work in my home?
Does it make financial sense for me to have it installed?
How many panels will I need?
How much can I reduce my electric bill?
Will solar panels make my home value increase?

Find out the answer to these questions and your additional solar electric questions at a FREE Green Center seminar held by **DaFlure Heating, Cooling, and Solar**, a Green Center partner and a Central Pennsylvania leader in solar installation. The public is invited.

Contact the Green Center to register for this course at www.greencentralpa.com or call 221-1300 x1477

When: Saturday, July 24, 2010,
9:30 to 11:00 am

Where: Green Center of Central PA

Who: Everyone is invited.

Pre-registration is recommended
